

User Manual for Zoom (for Mac)

This manual instruction will explain on how to access Zoom through the PC application.

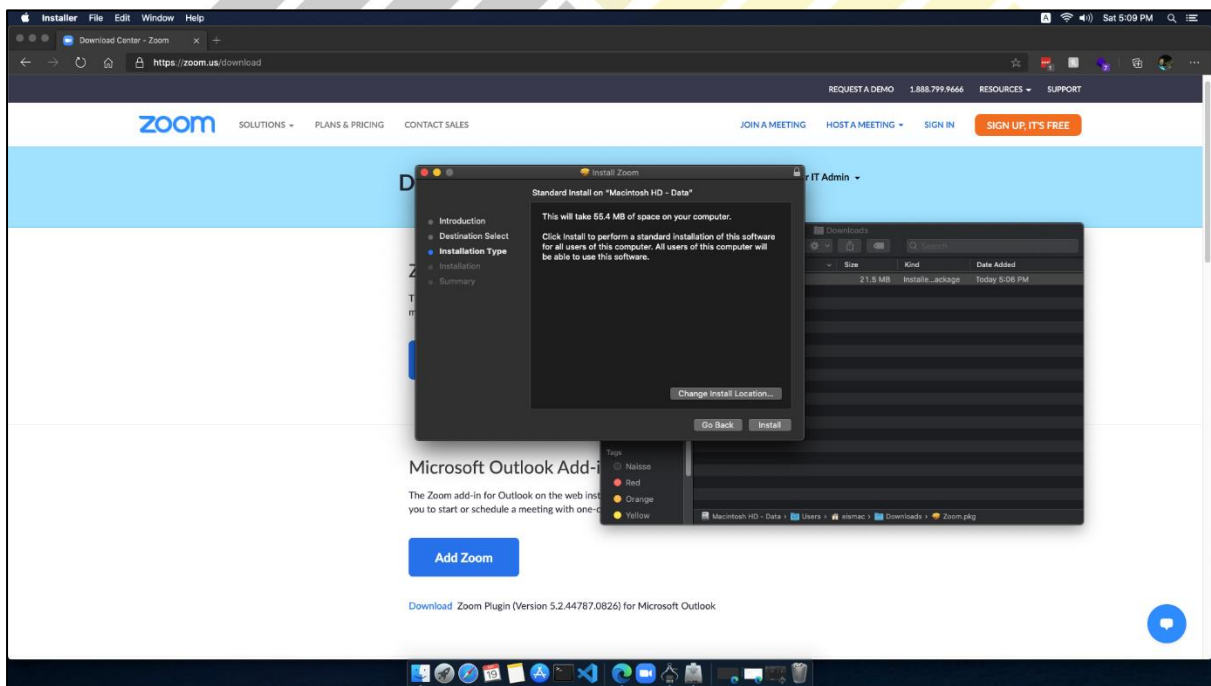

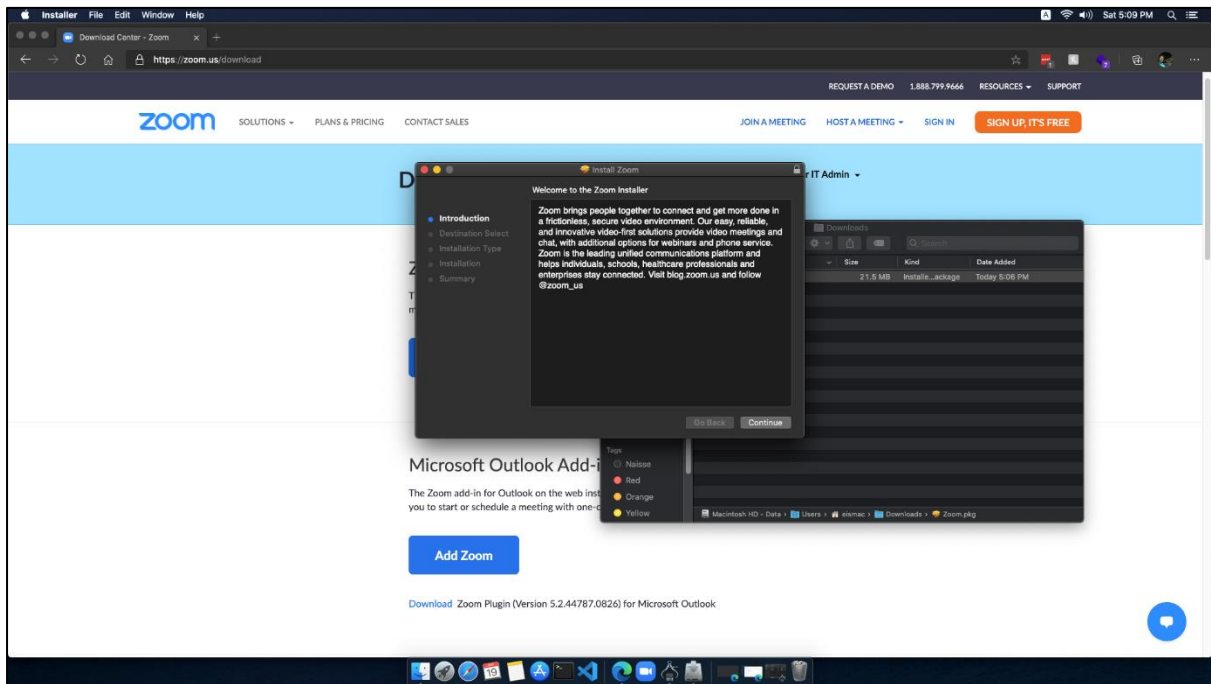

1. Please open your Internet browser. Search ‘zoom’ in your search input and select search icon. Under the search result “Zoom: Video Conferencing, Web Conferencing, Webinars ...”, select the “Download” link.

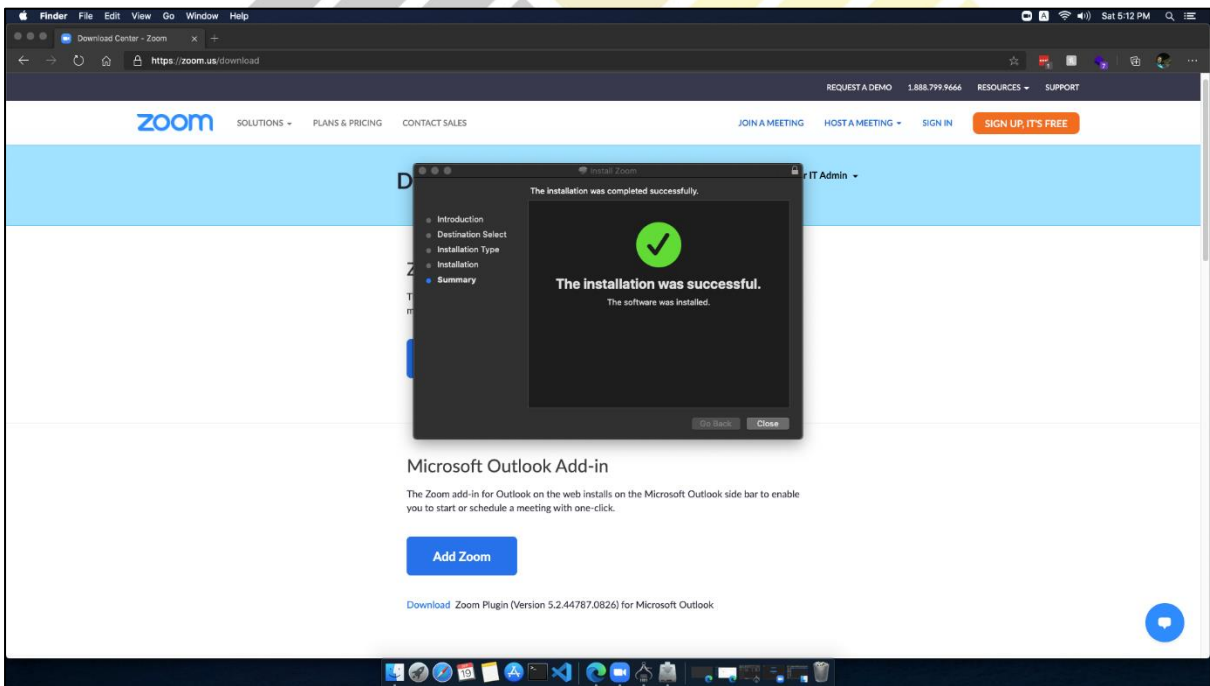

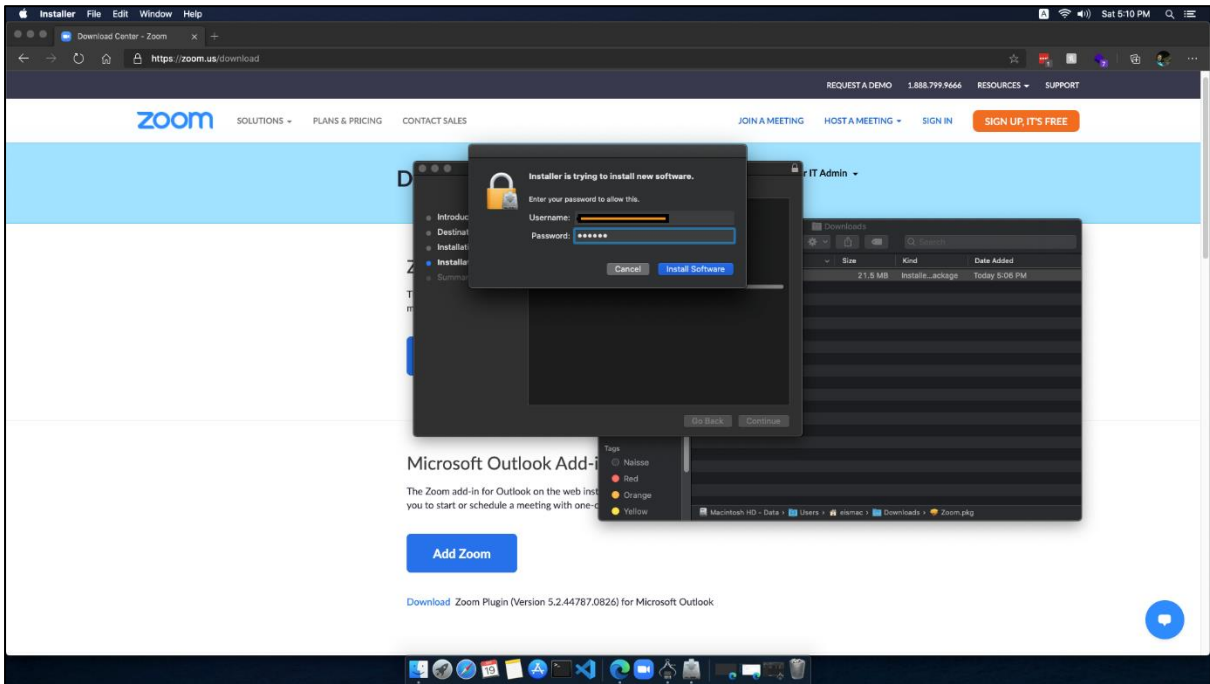

2. User will be redirected to the website “zoom.us, Download Center” page. Select on the ‘Download’ button.

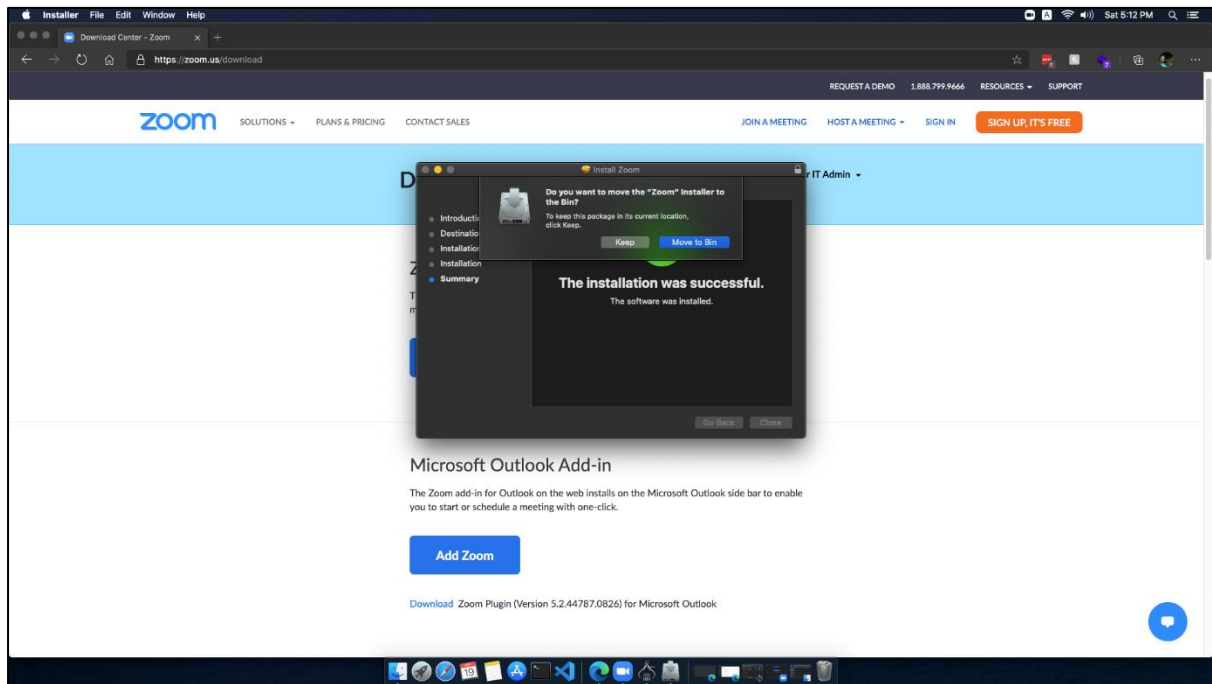

3. Double click on the Zoom.pkg that is downloaded in the "Downloads" folder (unless you have chosen to download the file to another location).

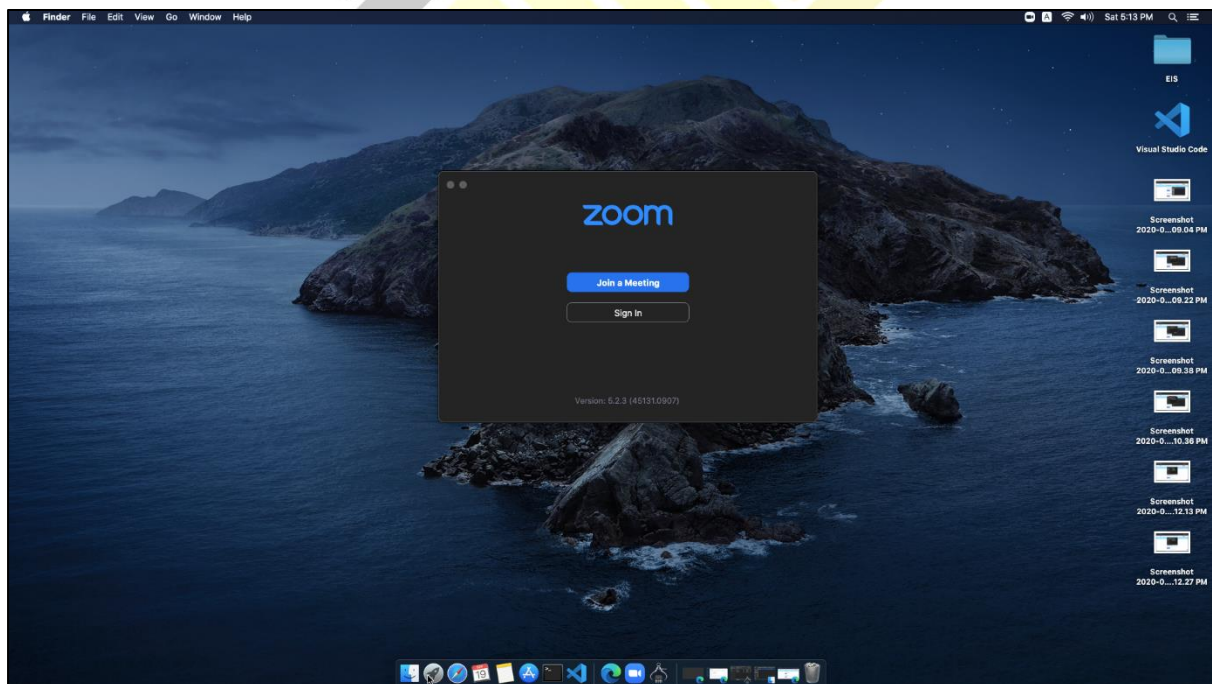

4. Go through the installation process by clicking continue.

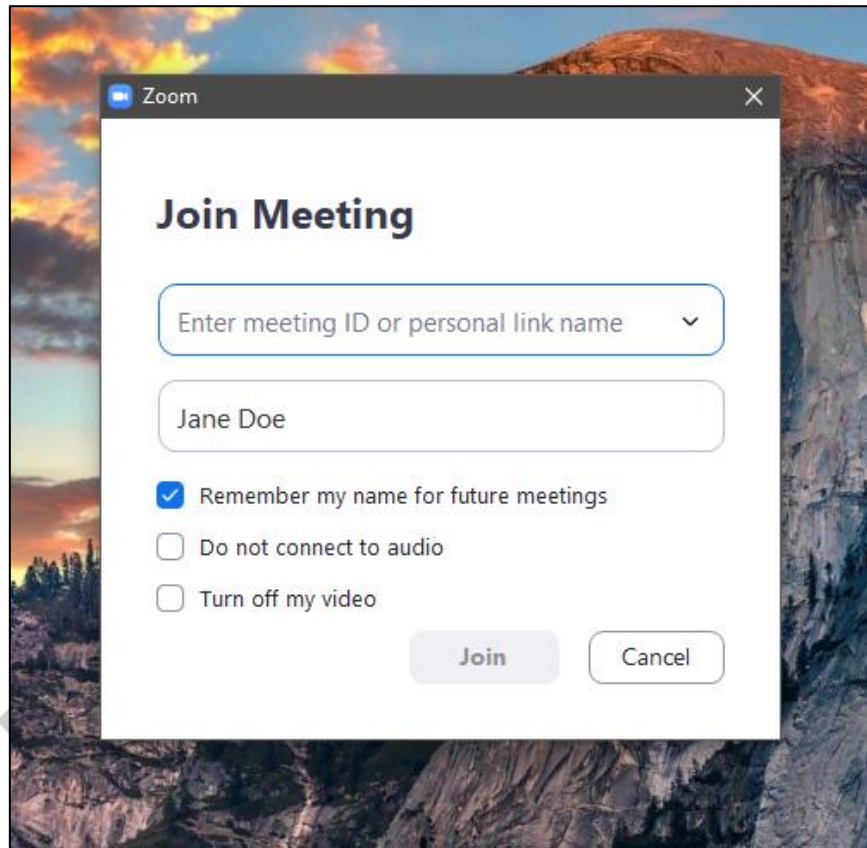

5. Keep or delete the installer once the installation is complete (We recommend deleting it to free up space).

6. Search for zoom in Mac Launchpad and run. Select on the 'Join Meeting' button or 'Sign In' if you have an account (It is **not** mandatory to sign in to join a meeting).

7. Insert 'Meeting ID' and 'User Name' in the text inputs. Select 'Join' button.

8. Once installed and once created a personal Zoom account, clicking on the meeting link provided by your contact will automatically open the application and automatically redirect you to the correct Meeting ID. Clicking on 'Join Meeting' will then be enough.

9. Search for zoom in Mac Launchpad and run.
