

## Zoom Manual (for iPhone)

This manual instruction will explain on how to search, download, and install Zoom application on iOS device.

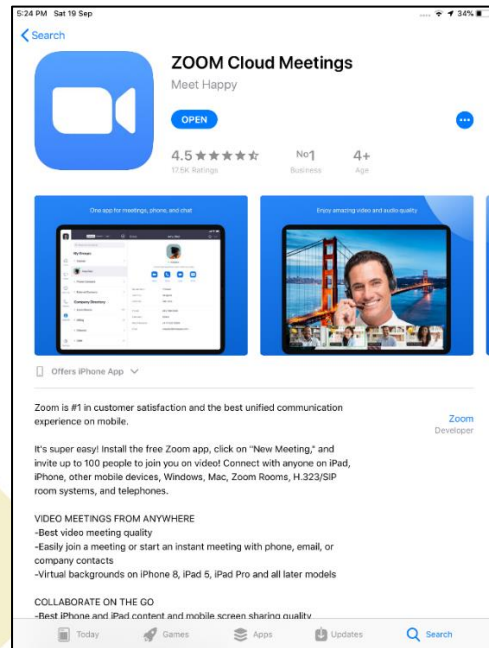

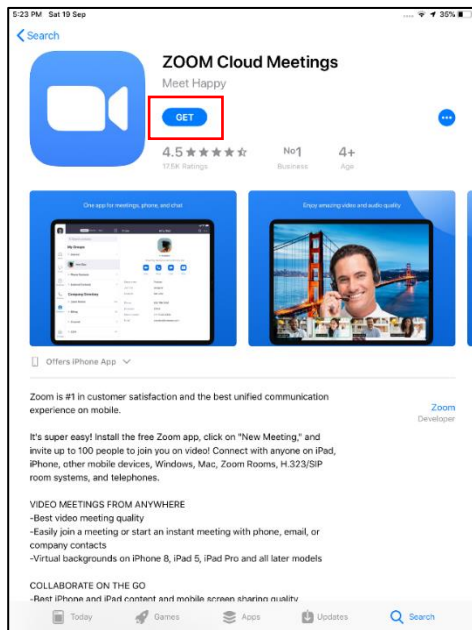

1. Open 'App Store' from your iOS device. Type "zoom" in the search text field. Select 'Search'/'Enter' icon.

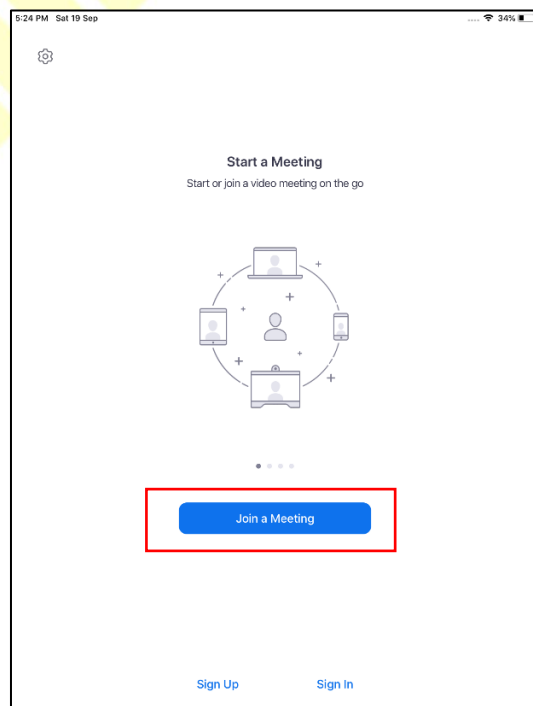

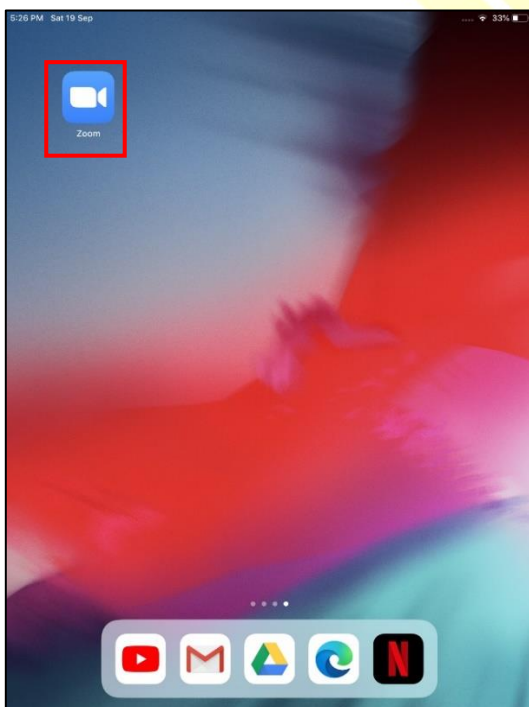

2. User will be able to see the list of the results from the search. Select 'ZOOM Cloud Meetings' by zoom.us.

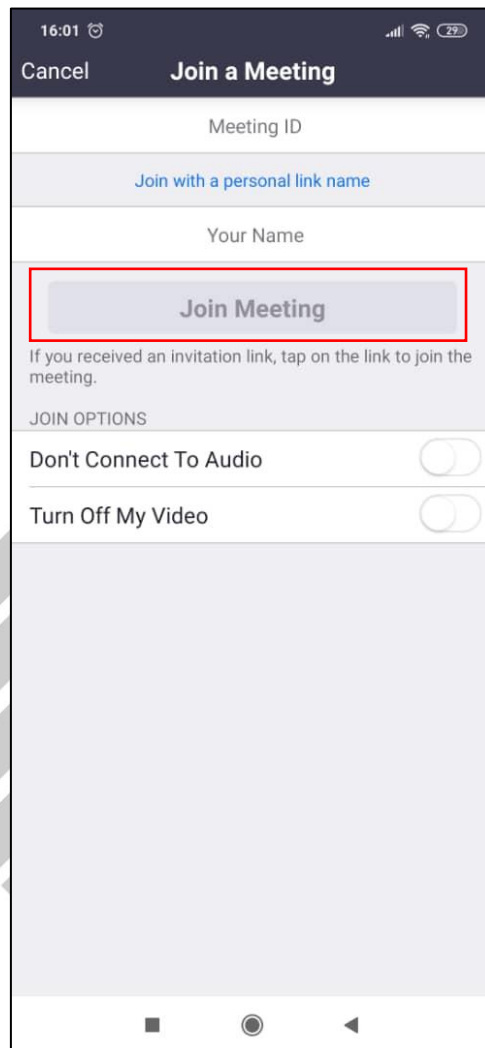

- Once selected, user will be redirected to the 'ZOOM Cloud Meetings' page. Select the 'Get' button. Wait until download and installation of the application is finished.

- Once the application has finished being installed, open the application from the device. Sometimes this was done automatically after installation. Select 'Join a Meeting' button on the Main page.

5. User will have to insert the 'Meeting ID' and 'Your Name' text fields. Select 'Join Meeting' button once text fields have been filled.

6. Once installed and once created a personal Zoom account, clicking on the meeting link provided by your contact will automatically open the application and automatically redirect you to the correct Meeting ID. Clicking on 'Join Meeting' will then be enough.
